### NHS Data Model and Dictionary Service

<b>Type:</b>	Data Dictionary Change Notice
<b>Reference:</b>	1417
<b>Version No:</b>	1.0
<b>Subject:</b>	Retirement of Standards - DSCNs 13/95/P12, 44/2001, 29/2004, 18/98/W02 and 24/98/F01
<b>Effective Date:</b>	1 April 2014
<b>Reason for Change:</b>	Retirement of Data Standards
<b>Publication Date:</b>	25 February 2014

#### Background:

The Information Standards Board for Health and Social Care (ISB) has conducted a review of all Data Set Change Notices (DSCNs) and Information Standards Notices (ISNs) issued since 1987, to update its portfolio of standards prior to the handover of responsibility to NHS England, the Health and Social Care Information Centre (HSCIC) and Public Health England.

This review has identified a number of data standards in the NHS Data Model and Dictionary which have been superseded or are no longer in use.

This Data Dictionary Change Notice (DDCN) retires the items in the NHS Data Model and Dictionary in line with the retirement of the following Data Set Change Notices, as listed on the ISB [Advanced Notification - Withdrawal](#) issued 26/09/13:

- DSCN 13/95/P12 - Admitted Patient Care & Home Births Contract Minimum Data Sets (Changes and additions from 01 April 1996)
- DSCN 44/2001 - Data Standards: Administrative Category
- DSCN 29/2004 - Data Standards: Inclusion of CDS and MHMDS message data definitions in the NHS Data Dictionary
- DSCN 18/98/W02 - Data Standards: Employment Contracts, Staff Postings and Payscale Points
- DSCN 24/98/F01 - Financial Central Returns and Manual for Accounts

## PROFESSIONAL STAFF GROUP CONTACT

---

Change to Supporting Information: Changed Description

[Professional Staff Group Contact](#) is a [CARE CONTACT](#).

A single occasion involving contact between a [PATIENT](#) or his/her proxy and one or more members of a professional staff group discipline from a [Professional Staff Group Department](#), including paid support staff working for a professional staff group discipline.

A [Professional Staff Group Contact](#) may follow from an [Out-Patient Appointment Non-Consultant](#), in this event the time seen should be recorded.

A proxy contact is a single occasion involving contact between a client/[PATIENT](#) or his/her proxy, and one or more members of a professional staff group discipline or relevant staff group for community service. Contacts with proxies count as face-to-face contacts only if the contact is in lieu of the contact with the client, and the proxy is able more

effectively than the client to ensure that specific professional advice devised for the client is followed. This is most likely to be the case where the client is unable to communicate effectively say for an infant, or for a [PERSON](#) who is mentally ill or learning disabilities.

For [Professional Staff Group Services](#), face to face contacts comprise both:

- a. Attendances lasting from the arrival to the departure of the [PATIENT](#)
- b. Visits lasting from the arrival to the departure of professional staff group staff

One or more members of the professional staff group discipline may be in contact with one or more [PATIENTS](#) at the same time and [PATIENTS](#) may be seen in association with staff from other disciplines. Contacts should be recorded as follows:

- a. If one or more staff of the same discipline are in contact with one [PATIENT](#) at the same time, this should be recorded as one face to face contact
- b. If staff see a [PATIENT](#) with staff of other disciplines, this should be recorded as one face to face contact for each discipline involved
- c. If one or more staff of one discipline are in contact with a group of [PATIENTS](#) at the same time, each [PATIENT](#) should be recorded as one face to face contact
- d. If staff from different disciplines are in contact with a group of [PATIENTS](#) at the same time, each [PATIENT](#) should be recorded as one face to face contact for each discipline involved

For physiotherapy, it may not be practical to collect data about all face-to-face contacts; however as a minimum, initial contacts and first contacts in financial year should be recorded.

For occupational therapy, the contact duration should be recorded in half-hour units.

If the [PATIENT](#) is currently subject to a [Mental Health Care Spell](#) and the member of the professional staff group discipline in contact is also their allocated care programme approach care coordinator then a [Face To Face Contact CPA Care Coordinator](#) should also be recorded.

Note: When face-to-face contacts are used for attributing professional staff group costs to [MAIN SPECIALTIES](#), it will be necessary to distinguish between those contacts by [PATIENTS](#) using a [Hospital Bed](#), attenders at [Consultant Clinics](#) and attenders at [Day Care Facilities](#).

~~Information recorded for a [Professional Staff Group Contact](#) includes:~~

- ~~[Contact Date](#)~~
- ~~[First Contact In Financial Year](#)~~
- ~~[Initial Contact](#)~~
- ~~[LOCATION](#)~~
- ~~[PATIENT FACILITY GROUP](#)~~
- ~~[Time Seen](#)  (if patient attends as a result of a clinic appointment)~~
