Publication Date:	26 February 2014

Background:

The Information Standards Board for Health and Social Care (ISB) has conducted a review of all Data Set Change Notices (DSCNs) and Information Standards Notices (ISNs) issued since 1987, to update its portfolio of standards prior to the handover of responsibility to NHS England, the Health and Social Care Information Centre (HSCIC) and Public Health England.

This review has identified a number of data standards in the NHS Data Model and Dictionary which have been superseded or are no longer in use.

This Data Dictionary Change Notice (DDCN) retires the items in the NHS Data Model and Dictionary in line with the retirement of the following Data Set Change Notices, as listed on the ISB [Advanced Notification - Withdrawal](#) issued 26/09/13:

- DSCN 37/98/A09 - Abolition of the Internal Market - NHS Service Agreements
- DSCN 14/97/P08 - Data Standards: Drug Misuse Databases
- DSCN 12/2002 - Data Standards: Elective admission suspension details
- DSCN 37/2003 - Data Standards: Measuring and recording of waiting times for KH07, QF01, QM08 and QM08R
- DSCN 14/2004 - Data Standards: Removal of CMDS

FACE TO FACE CONTACT COMMUNITY CARE

Change to Supporting Information: Changed Description

[Face To Face Contact Community Care](#) is a [CARE CONTACT](#).

[Face To Face Contact Community Care](#) is a contact which is made by one or more [NURSES](#) or community support workers (nursing) with a [PATIENT](#) or his/her proxy during a [Community Episode](#). The contact occurs when a [PATIENT](#) or their proxy attends a clinic or when the [NURSE](#) or community support worker (nursing)

makes a domiciliary visit to see the [PATIENT](#).

A proxy contact is a single occasion involving contact between a proxy and one or more members of a [COMMUNITY NURSE STAFF GROUP](#) within a [Nursing In The Community Programme](#). Contacts with proxies only count if the contact is in lieu of the contact with the [PATIENT](#), and the proxy is able more effectively than the [PATIENT](#) to ensure that the specified advice/treatment devised for the [PATIENT](#) is followed. This is most likely to be the case where the [PATIENT](#) is unable to communicate effectively say for an infant, or for a [PERSON](#) who is mentally ill or has learning disabilities.

One or more nurses or community support workers (nursing) in the same or different [Nursing In The Community Programmes](#) may be in contact with a [PATIENT](#) at the same time.

Contacts should be recorded as follows:

- a. If one or more [NURSES](#) or community support workers (nursing) from the same programme are in contact with one [PATIENT](#) at the same time, this should be recorded as one face-to-face contact
- b. If one or more [NURSES](#) or community support workers (nursing) from different programmes are in contact with one [PATIENT](#) at the same time, this should be recorded as one contact for each programme involved
- c. For contacts at a [Day Care Facility](#), where repeated contacts may occur during the course of a day, this should be recorded as one contact for each programme involved
- d. If two [NURSES](#) of different disciplines but both classed in the community nurse staff group other community nurses, such as stomatherapist and a continuing care nurse, are in contact with one [PATIENT](#) at the same time, this should be recorded as two face-to-face contacts, one for each discipline

Group activity, where, for example, general advice is given to several [PATIENTS](#) at the same time should not be recorded as [Nurse or Midwife Contacts](#).

A [Face To Face Contact Community Care](#) may involve [ACTIVITIES](#) attributable to a structured programme, such as the following:

- a. [Screening Test](#)
- b. [Group Session](#)
- c. Health Promotion Other Activity
- d. [EDUCATIONAL ASSESSMENT](#)
- e. Test of Immunity
- f. [Immunisation Dose Given](#)
- ~~g. [Face To Face Contact Surveillance](#)~~

For such [ACTIVITIES](#) they must be recorded as part of the respective structured programmes as well as attributed to the [Nursing In The Community Programmes](#).

If the [PATIENT](#) is currently subject to a [Mental Health Care Spell](#) and the contact [NURSE](#) is also their allocated care programme approach care coordinator then a [Face To Face Contact CPA Care Coordinator](#) should also be recorded.

For domiciliary visits, an indication of whether the [Face To Face Contact Community Care](#) is the first occasion on which a [PATIENT](#) is seen should be recorded as an [Initial Contact](#). A [LOCATION](#) type should also be recorded.

Information recorded for a [Face To Face Contact Community Care](#) includes:

[Contact Date](#)

[First Contact In Financial Year](#)

[Initial Contact](#) (applies to domiciliary visits only)

[LOCATION](#) (applies to domiciliary visits only)
