NHS Data Model and Dictionary Service

Type:	Data Dictionary Change Notice
Reference:	1432
Version No:	1.0
Subject:	Retirement of Standards - DSCN 3/92, DSCN 12/96/P11, DSCN 50/94/P36, DSCN 66/96/W09 and DSCN 16/93
Effective Date:	1 April 2014
Reason for Change:	Retirement of Data Standards
Publication Date:	26 February 2014

Background:

The Information Standards Board for Health and Social Care (ISB) has conducted a review of all Data Set Change Notices (DSCNs) and Information Standards Notices (ISNs) issued since 1987, to update its portfolio of standards prior to the handover of responsibility to NHS England, the Health and Social Care Information Centre (HSCIC) and Public Health England.

This review has identified a number of data standards in the NHS Data Model and Dictionary which have been superseded or are no longer in use.

This Data Dictionary Change Notice (DDCN) retires the items in the NHS Data Model and Dictionary in line with the retirement of the following Data Set Change Notices, as listed on the ISB [Advanced Notification - Withdrawal](#) issued 26/09/13:

- DSCN 3/92 - Data Definitions
- DSCN 12/96/P11 - Terminology Change - Manpower to Workforce. Minor Changes To Descriptions
- DSCN 67/95/P55 - Intended Procedure
- DSCN 50/94/P36 - Professional Advice/Support; Person in Contact Tracing Programme; Breast Assessment Date
- DSCN 66/96/W09 - Workforce Manual Alignment
- DSCN 16/93 - Spell Identifier within Day; Read Classification; Patient Diagnosis; Return Or Account Cell

PERSON IN ADVICE AND SUPPORT PROGRAMME (RETIRED)

Change to Supporting Information: Changed Description

This item has been retired from the NHS Data Model and Dictionary.

The last live version of this item is available in the February 2014 release of the NHS Data Model and Dictionary.

~~Access to this version can be obtained by emailing information.standards@hscic.gov.uk with "NHS Data Model and Dictionary - Archive Request" in the email subject line.~~ Access to this version can be obtained by emailing information.standards@hscic.gov.uk with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

SECURITY ISSUES AND PATIENT CONFIDENTIALITY

Change to Supporting Information: Changed Description

A. Removal of name and address where the NHS Number is present

- From 1 April 1999, [PATIENT NAME](#) and [PATIENT USUAL ADDRESS](#) (not [POSTCODE OF USUAL ADDRESS](#)) must be removed from all Commissioning Data Sets where a valid [NHS NUMBER](#) is present. This applies to all nationally defined Commissioning Data Set data and any additional locally agreed flows from service providers to commissioning bodies.
- A valid [NHS NUMBER](#) is one that has passed the check digit calculation on entry into the source system. If an [NHS NUMBER](#) is not valid (i.e. does not conform with the check digit algorithm) then [PATIENT NAMES](#) and [PATIENT USUAL ADDRESSES](#) should not be removed, as the reliability of the [NHS NUMBER](#) will not be known.
- The [NHS NUMBER STATUS INDICATOR CODE](#) is a mandatory part of the Commissioning Data Set. [PATIENT NAME](#) and [PATIENT USUAL ADDRESS](#) should be removed when a valid [NHS NUMBER](#) is present, even if the [NHS NUMBER STATUS INDICATOR CODE](#) does not have a status of 01, *Number present and verified*.

B. Marital Status

- ~~Following the recommendations of the Data Protection Registrar, Providers should not record [MARITAL STATUS](#) in any [CDS TYPE](#), except in respect of the psychiatric specialities in the Admitted Patient Care CDS Types, where it will continue to be recorded.~~

~~C. Sensitive data~~

- ~~Following the recommendations of the Data Protection Registrar, Providers should not record [PERSON MARITAL STATUS](#) in any [CDS TYPE](#), except in respect of the psychiatric specialities in the Admitted Patient Care CDS Types, where it will continue to be recorded.~~

C. Sensitive data

- The Human Fertilisation and Embryology Act 1990 as amended by the Human Fertilisation and Embryology (Disclosure of Information) Act 1992 imposes statutory restrictions on the disclosure of information about identifiable individuals in connection with certain infertility treatments. A list of the relevant codes is given in Table 1. In these cases the [NHS NUMBER](#), [LOCAL PATIENT IDENTIFIER](#), [PATIENT NAMES](#), [POSTCODE OF USUAL ADDRESS](#) and [PERSON BIRTH DATE](#) should be omitted from the CDS Types.
- From Commissioning Data Set Version 6-2, records where the patient-identifiable data has been withheld should be submitted using the PATIENT IDENTITY - WITHHELD IDENTITY STRUCTURE data group in CDS types where identification is carried. This data group allows only the [NHS NUMBER STATUS INDICATOR CODE](#) (the actual value held on source systems should be used), [ORGANISATION CODE \(RESIDENCE RESPONSIBILITY\)](#) and [WITHHELD IDENTITY REASON](#) to flow. The [WITHHELD IDENTITY REASON](#) allows [Health Care Providers](#) to inform their Commissioners why a record has been anonymised. Note that the same rules apply to the additional PATIENT IDENTITY structures relating to Mother and Baby in the Delivery and Birth CDS types.
- Other statutory restrictions on the disclosure of [PATIENT](#) information do not prohibit the disclosure to individuals involved with the treatment and prevention of certain specific diseases (HIV/AIDS and venereal diseases) in the population.

¹.- means all fourth characters of this rubric should be included.

* see [OPCS Classification of Interventions and Procedures](#)

- **All records containing patient identifiable information, other than those covered by the Human Fertilisation & Embryology Acts, as outlined in the Table above, should be treated as sensitive.** [ORGANISATIONS](#) may continue to exchange records containing [NHS NUMBER](#), [POSTCODE OF USUAL ADDRESS](#) and [PERSON BIRTH DATE](#) in these cases, but receiving organisations must ensure that only those staff with legitimate need have access to this information, e.g. public health departments, and strictly on a need to know basis. No-one should have unrestricted access unless fully justified in accordance with the principles of the Caldicott Committee Report.
- Where [PATIENT](#) level data is required for other purposes within an organisation, it should be anonymised/aggregated prior to disclosure by someone with legitimate access. If this is not practicable, local

protocols defining which [CDS TYPES](#) are particularly sensitive (including, but not necessarily restricted to HIV/AIDS and venereal disease) agreed by the organisation Caldicott Guardian, should be put in place and identifiers stripped from these records.

- Your Caldicott Guardian will be able to advise you further on all issues relating to patient confidentiality.
- Where appropriate, further information about confidentiality is contained within the notes for individual data items.
