

Health and Social Care Information Centre

NHS Data Model and Dictionary Service

Type: Data Dictionary Change Notice
Reference: 1484
Version No: 1.0
Subject: Female Genital Mutilation Snomed CT Subsets
Effective Date: Immediate
Reason for Change: Introduction of SNOMED CT® Subsets
Publication Date: 17 September 2014

Background:

The Female Genital Mutilation Prevalence Data Set collects information about the incidence and treatment of patients who have undergone Female Genital Mutilation. It does not include patients who have a family history of Female Genital Mutilation, but have not undergone the procedure themselves.

This Data Dictionary Change Notice (DDCN) adds the associated SNOMED CT® Subsets to the Female Genital Mutilation Data Set.

Note: New text is shown with a blue background. Deleted text is crossed out. Retired text is shown in grey. Within the Diagrams deleted classes and relationships are red, changed items are blue and new items are green.

FEMALE GENITAL MUTILATION PREVALENCE DATA SET OVERVIEW

Change to Supporting Information: Changed Description

The [Female Genital Mutilation Prevalence Data Set](#) collects information about the incidence and treatment of [PATIENTS](#) who have undergone Female Genital Mutilation. It does not include [PATIENTS](#) who have a family history of Female Genital Mutilation, but have not undergone the procedure themselves.

The data is collected on a monthly basis from [Health Care Providers](#) of NHS-funded care, including independent sector and social enterprise/voluntary organisations. Private and self-funded [PATIENTS](#) in NHS [Health Care Providers](#) are excluded.

The [Female Genital Mutilation Prevalence Data Set](#) consists of 3 sections:

- [PATIENTS](#) first identified within the [REPORTING PERIOD](#) as having undergone Female Genital Mutilation split by [FEMALE GENITAL MUTILATION AGE CATEGORY](#) and [FEMALE GENITAL MUTILATION TYPE](#).
- [PATIENTS](#) who were identified as having undergone Female Genital Mutilation prior to the [REPORTING PERIOD](#), and who are still being actively seen/treated by the [Health Care Provider](#) (i.e. they have not been discharged and are on the active caseload of the [Health Care Provider](#)) for any condition, whether related to the Female Genital Mutilation or not, as at the [REPORTING PERIOD END DATE](#). This is split by [FEMALE GENITAL MUTILATION AGE CATEGORY](#).
- Number of [CARE CONTACT](#) activities undertaken for the active caseload and newly-identified [PATIENTS](#) during the [REPORTING PERIOD](#), split by [TREATMENT FUNCTION CODE](#). This includes any attendances at an [Out-Patient Clinic](#) led by any type of [CARE PROFESSIONAL](#), [Hospital Provider Spells](#), [Accident and Emergency Attendances](#), [Group Therapy](#), [Ward Attendances](#); or any other type of direct [PATIENT](#)-facing [CARE CONTACT](#); and the number of deinfibulation [Patient Procedures](#) undertaken (first and repeat), both to facilitate childbirth or undertaken outside of the maternity environment. Note: for [TREATMENT FUNCTION CODES](#) where there have been no [CARE CONTACT](#) activities undertaken for the active caseload or newly-identified [PATIENTS](#) during the [REPORTING PERIOD](#), there is no requirement to report a zero value for that [TREATMENT FUNCTION CODE](#).

The associated [SNOMED CT Subsets](#) for the [Female Genital Mutilation Prevalence Data Set](#) are listed below:

- [Female genital mutilation related findings - Original ID 58681000000133](#)
- [Female genital mutilation related procedures - Original ID 58671000000131](#)

Further guidance on the creation and submission of the data set can be requested by emailing FGM@dh.gsi.gov.uk.

Collection and Submission of the [Female Genital Mutilation Prevalence Data Set](#)

- The [Female Genital Mutilation Prevalence Data Set](#) is a monthly provider based return.
- Provider returns must be submitted by the 5th working day for the previous calendar month.
- The data is submitted via [Unify2](#).
