<b>Version No:</b>	1.0
<b>Subject:</b>	Retirement of KC50: Immunisation Programmes Activity Data Set (KC50)
<b>Effective Date:</b>	Immediate
<b>Reason for Change:</b>	Retirement of out of date content
<b>Publication Date:</b>	23 April 2019

## Background:

As part of the ongoing work to implement a new version of the NHS Data Model and Dictionary, a review of legacy and out of date data sets contained within the NHS Data Model and Dictionary has been carried out.

A number of data sets are out of date and have been identified for retirement from the NHS Data Model and Dictionary. Note that the relevant Data Set Change Notices (DSCNs) have been reviewed and withdrawn where appropriate. This Data Dictionary Change Notice (DDCN) retires the Immunisation Programmes Activity Data Set (KC50).

To view a demonstration on "How to Read an NHS Data Model and Dictionary Change Request", visit the NHS Data Model and Dictionary help pages at: [https://www.datadictionary.nhs.uk/Flash\\_Files/changerequest.htm](https://www.datadictionary.nhs.uk/Flash_Files/changerequest.htm).

Change to Supporting Information: Changed Description, status to Retired, Name

[Immunisation Dose Given](#) is a [CLINICAL INTERVENTION](#). This item has been retired from the NHS Data Model and Dictionary.

An immunisation dose given to a [PERSON](#) within an [Immunisation Programme](#). The last live version of this item is available in the March 2019 release of the NHS Data Model and Dictionary.

It must be noted that it is often the case that one injection may include immunisation against more than one disease; such an injection is said to be considered a part of many programmes as the disease it is aimed to prevent. For example, it is common for doses of vaccine against diphtheria, tetanus and pertussis to be delivered as a dose injection is given. It is not relevant to the disease prevention programme whether the doses are delivered in triples, doubles or singly, only that they are delivered. However, there is a requirement to report centrally the number of measles, mumps and rubella (MMR) triples given. Access to this version can be obtained by emailing [information.standards@nhs.net](mailto:information.standards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.

**This return is suspended.**

For further information, see the [NHS Digital](#) website at: [Immunisation Programmes Collection \(KC50\)](#).

The [Immunisation Programmes Activity Data Set \(KC50\)](#) requires summary information from [Primary Care Trusts](#) about the delivery of [Immunisation Programmes](#) for the following diseases:

- Diphtheria, Tetanus and Polio (Td/IPV)
- Measles, Mumps and Rubella (MMR), and
- Tuberculosis (BCG).

The responsible population for the [Primary Care Trusts](#) with respect to the delivery of these [Immunisation Programmes](#) includes:

- [PERSONS](#) registered with a [GENERAL MEDICAL PRACTITIONER](#) whose [GP Practice](#) is under the responsibility of the [Primary Care Trust](#), regardless of where the child is resident, and
- any [PERSONS](#) not registered with a [GENERAL MEDICAL PRACTITIONER](#), who are resident within the [Primary Care Trust GEOGRAPHIC AREA](#).

This does not include [PERSONS](#) who are resident within the [Primary Care Trust GEOGRAPHIC AREA](#) but registered with a [GENERAL MEDICAL PRACTITIONER](#) whose [GP Practice](#) is under the responsibility of a different [Primary Care Trust](#).

## Reporting

The [Immunisation Programmes Activity Data Set \(KC50\)](#) is reported for each financial year (i.e. between 1st April and 31st March), and must be received no later than the last working day of April. Reporting is via the [Omnibus Survey](#) collection tool provided by [NHS Digital](#).

For further information on the [Immunisation Programmes Activity Data Set \(KC50\)](#), see the [NHS Digital](#) website at: [Immunisation Programmes Collection \(KC50\)](#).
