

# NHS Data Model and Dictionary

**Type:** Data Dictionary Change Notice  
**Reference:** 1731  
**Version No:** 1.0  
**Subject:** Retirement of Quarterly Bed Availability and Occupancy Data Set (KH03)  
**Effective Date:** Immediate  
**Reason for Change:** Retirement of out of date content  
**Publication Date:** 21 August 2019

## Background:

As part of the ongoing work to implement a new version of the NHS Data Model and Dictionary, a review of legacy and out of date data sets contained within the NHS Data Model and Dictionary has been carried out.

A number of data sets are out of date and have been identified for retirement from the NHS Data Model and Dictionary. However, it must be noted that the Information Standards still remain and the collections should be submitted as required.

This Data Dictionary Change Notice (DDCN) retires the Quarterly Bed Availability and Occupancy Data Set (KH03) and supporting definitions from the NHS Data Model and Dictionary only.

To view a demonstration on "How to Read an NHS Data Model and Dictionary Change Request", visit the NHS Data Model and Dictionary help pages at: [https://www.datadictionary.nhs.uk/Flash\\_Files/changerequest.htm](https://www.datadictionary.nhs.uk/Flash_Files/changerequest.htm).

## HOSPITAL BED

---

Change to Supporting Information: Changed Description

A [Hospital Bed](#) includes any device that may be used to permit a [PATIENT](#) to lie down when the need to do so is as a consequence of the [PATIENT](#)'s condition rather than the need for active intervention such as examination, diagnostic investigation, manipulation/treatment, or transport. Cots should be included in statistics about [Hospital Beds](#) where appropriate.

It should be noted that:

- A couch or trolley should be considered as a [Hospital Bed](#) provided it is used regularly to permit a [PATIENT](#) to lie down rather than for merely examination or transport. An example of such an arrangement is a day surgery ward furnished with trolleys
- A [PATIENT](#) may need to use a [Hospital Bed](#), couch or trolley whilst attending for a specific short procedure taking an hour or less, such as an endoscopy. If such devices are being used only because of the active intervention and not because of the [PATIENT](#)'s condition, they should NOT be counted as [Hospital Beds](#) for statistical purposes
- A [PATIENT](#) needing a lengthy procedure such as renal dialysis may use a [Hospital Bed](#) or other means of support such as a couch or special chair. Whatever the device used it should be counted as a [Hospital Bed](#) if used regularly for this purpose
- Some procedures require narcosis. If this necessitates the [PATIENT](#) to lie down, the [Hospital Bed](#), couch or trolley can be counted as a [Hospital Bed](#) if used regularly for this purpose
- A device specifically and solely for the purpose of delivery should not be counted as a [Hospital Bed](#) if another device is normally reserved for [Antenatal](#) and [Postnatal](#) care. Details of the facilities available for delivery in a maternity ward should be included in a [WARD](#) inventory.

[Hospital Beds](#) may be reserved and unavailable for a variety of reasons, including when they are vacated by [PATIENTS](#) who are on [Home Leave](#).

A [Hospital Bed](#) vacated by a [PATIENT](#) while on [Home Leave](#) or [Mental Health Leave of Absence](#) for 28 days or less, or with a current period of [Absence Without Leave](#) of 28 days or less, may be recorded as reserved and not available because of [Home Leave](#), [Mental Health Leave of Absence](#) or [Absence Without Leave](#).

However, if a [Hospital Bed](#) that is reserved for whatever reason is occupied by another [PATIENT](#) it should be recorded as available and occupied.

[Hospital Beds](#) may be used sometimes by healthy [PERSONS](#) accompanying a [PATIENT](#). When this occurs the [Hospital Bed](#) should be recorded as unavailable because it is being used by a healthy [PERSON](#).

## QUARTERLY BED AVAILABILITY AND OCCUPANCY DATA SET OVERVIEW (RETIRED), renamed from QUARTERLY BED AVAILABILITY AND OCCUPANCY DATA SET OVERVIEW

---

Change to Supporting Information: Changed status to Retired, Name, Description

~~This data set is out of date therefore the information should not be used.~~ This item has been retired from the NHS Data Model and Dictionary.

For further information, see the [NHS England](#) website at: [Bed Availability and Occupancy](#).

The ~~Quarterly Bed Availability and Occupancy Data Set (KH03)~~ requires summary information from NHS [Health Care Providers](#) for [Hospital Bed](#) availability and occupancy. It identifies the number of available and occupied bed days for each NHS [Health Care Provider](#). ~~The last live version of this item is available in the July 2019 release of the NHS Data Model and Dictionary~~

### Reporting Period:

~~This collection is reported quarterly. NHS [Health Care Providers](#) should submit their data on the fifth Friday following the end of the quarter. Reporting is via [Unify2](#). Access to this version can be obtained by emailing [information.standards@nhs.net](mailto:information.standards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.~~

**Scope:-**

The [Quarterly Bed Availability and Occupancy Data Set \(KH03\)](#) reporting requirements are as follows:

- **M** – Summary information for [Hospital Bed](#) availability and occupancy for each [MAIN SPECIALTY CATEGORY CODE FOR BED AVAILABILITY AND OCCUPANCY](#) – this requirement is **mandatory**.
- **R** – Summary information, where available, for [Hospital Bed](#) occupancy for each [CARE PROFESSIONAL MAIN SPECIALTY CODE](#). This information is **required**, i.e. it should be reported for each [CARE PROFESSIONAL MAIN SPECIALTY CODE](#) where [BED DAYS IN WARDS OPEN DAY ONLY \(OCCUPIED\)](#) and [BED DAYS IN WARDS OPEN OVERNIGHT \(OCCUPIED\)](#) are recorded.

**Note:**

Summary information for bed availability for each [CARE PROFESSIONAL MAIN SPECIALTY CODE](#) is not reported in the [Quarterly Bed Availability and Occupancy Data Set \(KH03\)](#).

**Exclusions:**

The collection does not include:

- residential [Care Home](#) beds,
- [Hospital Beds](#) occupied and designated solely for use by [Well Babies](#).

**QUARTERLY BED AVAILABILITY AND OCCUPANCY DATA SET OVERVIEW (RETIRED), renamed from QUARTERLY BED AVAILABILITY AND OCCUPANCY DATA SET OVERVIEW**

Change to Supporting Information: Changed status to Retired, Name, Description

Retired.Data\_Dictionary.Messages.Central\_Returns\_Data\_Sets.Quarterly\_Bed\_Availability\_and\_Occupancy\_Data\_Set\_Overview to
- Changed Description

**DAILY WARD LISTING (RETIRED), renamed from DAILY WARD LISTING**

Change to Class: Changed status to Retired, Name, Attributes, Description

This records all the [ACTIVITY](#) that has occurred in the [WARD](#) in the previous 24 hours and the [Hospital Bed](#) availability status of the [WARD](#). [DAILY WARD LISTINGS](#) should be completed at midnight, or during the working day in [WARDS](#) only open for limited periods. **This item has been retired from the NHS Data Model and Dictionary.**

[Hospital Beds](#) may be reserved and unavailable for a variety of reasons, including when they are vacated by [PATIENTS](#) who are on [Home Leave](#). **The last live version of this item is available in the July 2019 release of the NHS Data Model and Dictionary**

A [Hospital Bed](#) vacated by a [PATIENT](#) while on [Home Leave](#) or [Mental Health Leave of Absence](#) for 28 days or less, or with a current period of Absence Without Leave of 28 days or less, may be recorded on the [DAILY WARD LISTING](#), if unoccupied, as reserved and not available because of [Home Leave](#), [Mental Health Leave of Absence](#) or Absence Without Leave. **Access to this version can be obtained by emailing [information.standards@nhs.net](mailto:information.standards@nhs.net) with "NHS Data Model and Dictionary - Archive Request" in the email subject line.**

However, if a [Hospital Bed](#) that is reserved for whatever reason is occupied by another [PATIENT](#) it should be recorded as available and occupied.

[Hospital Beds](#) may be used sometimes by healthy [PERSONS](#) accompanying a [PATIENT](#). When this occurs the [Hospital Bed](#) should be recorded as unavailable because it is being used by a healthy [PERSON](#).

[Hospital Bed](#) availability should be measured in terms of [Hospital Bed](#) days for all [WARDS](#) which are open overnight. [WARDS](#) open only during the day time or at night should be separately identified and the [Hospital Bed](#) availability measured on the basis of the number of days or nights for which a [SERVICE](#) is being provided. For [WARDS](#) open overnight, [Hospital Bed](#) availability should be measured as at midnight.

For [WARDS](#) only open during the day, [Hospital Bed](#) availability should be measured in the morning. If a [WARD](#) is open for five days and four nights, the [Hospital Bed](#) availability on the fifth day should be measured in the morning.
